

Save, preserve and  
protect: With REMIS!

**Triple success with REMIS:**

With REMIS you save energy and so reduce costs too, preserve the environment for the long term, and protect your employees and customers from germs, viruses and bacteria

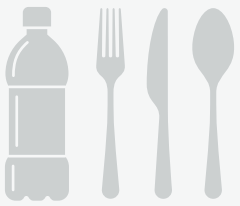

# Optimum combination:

## Reduce costs while helping to preserve the environment and protect health

### Advantages at a glance

- With REMIS insulating glass doors, you can save up to 77% in **electricity costs**
- By dramatically cutting electricity consumption, you also help to reduce costs and make a significant, lasting contribution to **environmental protection**
- REMIS insulating glass doors, covers and hygiene walls protect your staff and customers from infections and contagions with and by germs, viruses and bacteria:
  - No transmission of pathogens to the goods behind insulating glass and covers through droplets (sneezing and coughing)
  - Easy, fast disinfection and cleaning of all surfaces including handles possible

### Risk of contact transmission: This is how long Coronavirus survives on surfaces

After **four hours**  
Coronavirus can still be  
detected on **copper!**

Coronavirus can survive on  
**plastic and stainless steel**  
for up to **three days!**

On **cardboard**,  
Coronavirus can survive  
for **24 hours!**

### Extensive REMIS product range
